EDUCATION

McMaster University

BS in Computer Science and Mathematics

Expected Graduation: December 2025

- **Relevant coursework:** Data Structures and Algorithms, Automata and Computability, Intro to Software Development, Principles of Programming Languages, Information Security, Algorithms and Complexity
- **Clubs and Societies:** Chairman of the Computer Science Student Society, President of McMasters Math and Computer Science Official Discord Server and Facilitator of McMaster Chess Club.

EXPERIENCE

Software Engineer | *The Win Column*

May 2024 – August 2024

- Spearheaded the development of a dynamic educational platform using **JavaScript**, enhancing course management efficiency similar to **Coursera**, and improving user engagement by an estimated **20%**. Implemented **SCSS**, which increased the maintainability and readability of the codebase by **30%**.
- Utilized **Node.js** and **Express.js** to develop lightweight, efficient server-side capabilities and streamline the creation of **RESTful APIs**, reducing server response time by **25%** and improving user request handling.
- Ensured smooth operation for over **100 active users**, effectively managing their data and maintaining high performance, leading to a **15%** improvement in system reliability, using **MongoDB Atlas**.
- Engineered a responsive and intuitive user interface, resulting in a **40%** increase in mobile user satisfaction, by ensuring seamless usability

Full Stack Developer | *McMaster MSA*

Oct 2024 – Present

- Collaborated in a team of 6 to develop a full-stack website and portal for McMaster MSA, providing a seamless platform for students and administrators. Utilized **React**, **Next.js**, and **Tailwind CSS** for a responsive front-end, ensuring a user-friendly interface with a modern design.
- Implemented secure portal access for administrators using **Firebase Authentication**, enabling efficient management of events, announcements, and user data.
- Utilized **Firebase Firestore** as the backend to store and manage user data, providing a scalable and real-time database solution that ensured data integrity and security.
- Engineered the website to handle over **5000 active users**, optimizing performance and ensuring seamless functionality under high traffic conditions through efficient load balancing and database management.

Front-End Developer | *Road 2 Righteousness*

Oct 2024 – Jan 2025

- Developed a custom website for an Umrah service company using **React** and **Tailwind CSS**, resulting in a **25%** increase in conversion rates by providing a seamless and engaging user experience.
- Implemented a fast responding back-end funnel with responsive design that enhanced consistency and confirmations, contributing to a sales increase of **\$135,000** over a three-month period.
- Utilized **GSAP** animations to add dynamic and interactive elements, which captivated users and directly boosted engagement, leading to a **20%** rise in customer inquiries.
- Optimized website performance for high traffic, ensuring quick load times and smooth operation during peak usage, which significantly enhanced user satisfaction and supported the overall sales growth.

TECHNICAL SKILLS

Languages : Python, C/C++, JavaScript, TypeScript, HTML, CSS, Sass

Frameworks/Libraries : React Native, Three.js, Node.js

DevOps and API Tools : Git, GitHub, DBeaver

Others : Data Modeling, Design Patterns, JSON, MongoDB, MySQL, Eclipse, VSCode
