

# Aymen Shoteri

Software Engineer | Full-Stack · Cloud · AI

[shoteriaymen@gmail.com](mailto:shoteriaymen@gmail.com) | [linkedin.com/in/aymen-shoteri](https://linkedin.com/in/aymen-shoteri) | [github.com/AymenS02](https://github.com/AymenS02) | [aymenshoteri.com](https://aymenshoteri.com)

## PROFESSIONAL SUMMARY

McMaster Mathematics & Computer Science graduate with hands-on experience building production full-stack applications using **TypeScript, React/Next.js, Node.js, and MongoDB**. Microsoft-certified Azure AI Cloud Developer with practical experience across **REST APIs, authentication, real-time systems, payments, Docker, CI/CD, and cloud application development**.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, Java, C, C++, SQL  
**Frontend:** React, Next.js, React Native, Tailwind CSS, HTML/CSS  
**Backend:** Node.js, Express, REST APIs, Socket.IO, NextAuth, Authentication/Authorization  
**Databases:** MongoDB, MongoDB Atlas, PostgreSQL, MySQL, Firebase, Supabase  
**Cloud & DevOps:** Microsoft Azure, AWS, Docker, GitHub Actions, CI/CD, Git, GitHub  
**Integrations:** Stripe, Cloudinary, AI API Integration

## SOFTWARE EXPERIENCE

- Full Stack Developer** Jan 2025 – Dec 2025  
*McMaster University* *Hamilton, ON*
  - Improved page-load performance by 25%** using Lighthouse and Web Vitals by optimizing database queries, enabling server-side rendering, and reducing client bundle size.
  - Engineered React, Node.js, and Firebase functionality** for secure administrative content management, implementing authentication and access controls while validating performance under **1,000+ concurrent-user** load tests.
- Front-End Developer** Oct 2024 – Jan 2025  
*R2R* *Barrie, ON*
  - Developed a production React application serving 200+ active users**, integrating responsive interfaces with backend APIs for registration and application data workflows.
  - Implemented secure user and payment workflows supporting \$50,000+ in transactions**, including protected credential handling and backend payment-gateway integration.
- Full Stack Developer** Apr 2024 – Aug 2024  
*The Win Column* *Toronto, ON*
  - Built backend services and REST APIs using Python, Node.js, and MongoDB Atlas**, supporting course management, persistent user data, and frontend application workflows.
  - Increased user registrations by 20%** by simplifying the signup flow while improving database performance through query optimization and indexing.

## SELECTED PROJECTS

- Khans Food E-Commerce Platform** | *Next.js, TypeScript, MongoDB, Stripe, NextAuth* 2026
  - Architected a full-stack ordering platform** with authentication, menu/cart workflows, checkout, pickup and catering logic, order management, and role-based administrative functionality.
  - Integrated Stripe, NextAuth, MongoDB, and Cloudinary** with server-side validation and business rules across customer and administrator workflows.
- X-Ray Waitlist Management System** | *React, Node.js, MongoDB, Socket.IO* 2026
  - Built a real-time clinic queue system** with receptionist, patient, and waiting-room interfaces, using Socket.IO to synchronize queue changes and MongoDB to persist patient and status data.
- ShiftShare Mobile Scheduling** | *React Native, Node.js, Express, MongoDB* 2026
  - Developed a mobile workforce scheduling application** with authentication, shift management, swap requests, notifications, and REST APIs connecting the React Native client to a Node/Express backend.

## CERTIFICATION

**Microsoft Certified: Azure AI Cloud Developer Associate** 2026

## EDUCATION

**McMaster University** Hamilton, ON  
*Combined Honours B.Sc. in Mathematics & Computer Science* 2026

- Coursework:** Data Structures & Algorithms, Software Design & Architectures, Programming for Performance
